

KBR has a strong track record of delivering some of the world's most complex, safety critical, and heavily regulated maritime facilities and infrastructure. Our solutions consider long-term operations and whole-of-life costs, measuring success not only by the immediate results, but by the long-term outcomes and benefits to the community.

DEFENCE INFRASTRUCTURE In Australia, our naval infrastructure legacy began over 40 years ago with the design of the original Collins Class submarine facilities and infrastructure at the Osborne Naval Shipyard. This legacy continues today, with KBR contributing to the concept design for the Nuclear-Powered Submarine Construction Yard at Osborne, and the detailed design for the facilities and infrastructure to deliver the Submarine Rotational Force-West Priority Works at HMAS Stirling.

PORT INFRASTRUCTURE Supporting the country's critical port infrastructure, our experience includes dredging and reclamation, marine off-loading facilities, subsea pipelines, and offshore resources facilities.

ASSET LIFE ASSESSMENT We help clients maximise the performance and lifespan of aging maritime infrastructure by providing comprehensive structural assessment and rehabilitation services.

COASTAL AND ENVIRONMENT MODELLING To better understand the impacts of storm surges, rising sea-level, erosion, and sediment transport to marine infrastructure and the coastal environment, our team of experts apply complex modelling and analytics to help future proof, mitigate climate change risk and reduce environmental impact.

We do things that matter.®

Want to do work that matters?

THINK KBR

At KBR, our people are our most valuable asset; we want them to thrive and succeed in all aspects of their lives. We are dedicated to creating work environments in which every member of our team of teams feels safe, supported, respected, trusted and valued, and where each person is given opportunities to belong, connect and grow. With a strong pipeline of work our maritime team is currently looking to grow the team! If you are considering your next move, check out the list of openings below.
