## BollardScan™

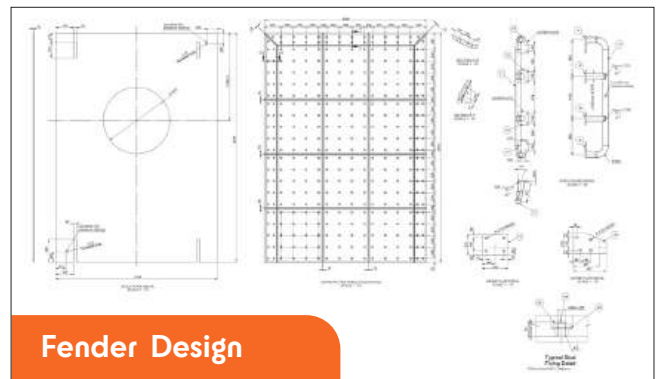

Exclusive service provider

MoorMarine are proudly partnered with Bollard Scan who have more than 60 years' experience in the maritime industry, specializing in non-destructive bollard testing in ports, docks around the world. The bollard scan process (which is approved by Lloyd's Register) enables the port owner/operator to understand the integrity and condition of bollard equipment.

Together with the detailed report, a certificate is issued on the state of the bollard together with a 3-year guarantee.
